SUMMARY

Motivated and enthusiastic Front-End Web Developer with a solid foundation in HTML, CSS, and responsive design. Proficient in creating user-friendly, visually appealing websites, and currently deepening expertise in JavaScript, Bootstrap, and modern front-end frameworks. Familiar with backend concepts such as MySQL and PHP, with a growing interest in full-stack development. Passionate about building real-world projects, writing clean and maintainable code, and eager to contribute to collaborative development teams while continuously learning and improving.

PROJECTS

Voice-Controlled Calculator – Java (Desktop Application)

- Developed a calculator that takes voice input using CMU Sphinx.
- Used Stack data structure to evaluate mathematical expressions.

Book Review & Rating Website

- Users can browse and search for books, add reviews and ratings, and suggest new books.
- Includes an admin panel for content management.
- Built using HTML, CSS, PHP, basic JavaScript, and MySQL.

Packers & Movers – Website

- Built using HTML, CSS, PHP, and MySQL.
- Enables users to browse and book relocation services.
- Designed to simplify the scheduling of moves through a user-friendly online interface.
